Computer Fundamentals

- Computer is an *electronic device* i.e. used to work with information or compute. It is derived from the latin word "computare" which means to calculate.
- Our computer fundamentals tutorial includes all topics of computer fundamentals such as input devices, output devices, memory, cpu, motherboard, computer network, virus, software, hardware etc.

2021 - 22

Web Development

- Web development refers to the building, creating, and maintaining of websites. It includes aspects such as web design, web publishing, web programming, and database management. It is the creation of an application that works over the internet i.e. websites Greeted visitors and determined to whom and when they could speak with specific individuals
